

## Lighting Eligibility Details

- Fluorescent T12 Fixture Retrofits:
  - Rebates are based on one-for-one replacement of fluorescent T12 lamps controlled by magnetic ballasts or electronic or incandescent fixtures. The new fixtures must include high efficiency electronic ballasts
- LEDs:
  - LED lamps and interior luminaires must be Energy Star Qualified
  - All other LED fixtures and lighting must be either Energy Star Qualified, Lighting Facts or DesignLights Consortium Qualified
- LED Luminaires:
  - Luminaires must be commercial rated
- Parking Garage Lighting:
  - Reduce total lighting energy use to 0.18 watts per square foot or less
- Delamping:
  - Rebates are based on the permanent removal of the equivalent of at least one 4' (T12, T12HO or T8) lamp from an existing 8' or 4' fixture as a result of a retrofit
- Reflector Kits:
  - Reflector kits must be installed in conjunction with delamping or installation of lower wattage lamps (e.g., 32 Watt lamps to 28 Watt lamps)
  - Reflector must have a reflectivity value equal to or greater than 90% and match the number of new fluorescent lamps
- Occupancy Sensors/Controls:
  - Proper design and installation of occupancy sensors and/or controls that reduce on-time, such as daylighting controls or timers. Also applicable to intermittent ventilation fans and/or heat lamps. Must be hard-wired to qualify
- Solar Tubes:
  - Must be installed in areas occupied during business hours, or central hallways requiring artificial lighting
- Vending machine lighting:
  - LED retrofit
