

THE CITY OF ASPEN

## **Restaurant Compost Program**

**About the program:** The City of Aspen received a grant from the State of Colorado to develop and build a food waste compost program in Aspen. As part of the grant, the Pitkin County Landfill purchased a large compost grinder to break down food and paper waste in preparation for composting. The Pitkin County Landfill is now accepting food and paper waste on a regular basis from all haulers in the Roaring Fork Valley.

**What does this mean for restaurants?** About 60-70% or more of an Aspen restaurant's trash is actually compostable. That means restaurants can save money and reduce their environmental footprint by composting.

### **How does a restaurant compost?**

**Step 1.** Separate food and paper waste from the trash in the restaurant. The City of Aspen has FREE 25 gallon slim jim containers for inside collection for participating restaurants. We are also available to train your staff (in English or Spanish) on what is compostable.

**Step 2.** Transport the separated food waste to the outside collection bin. Local waste haulers will provide a bear proof collection bin and City staff will label these bins. While supplies last, free bear proof 96gallon bins are available from the City of Aspen.

**Step 3.** The waste hauling company will set a pick up schedule for that bin. The bin will be emptied and taken to the Pitkin County Landfill for processing.

**Step 4.** Need soil for a project? The finished product, rich soil, is available for purchase year round at the Pitkin County Landfill.

**Contact.** Please call or email to let us know if your restaurant is interested. Liz O'Connell, program manager, is available at 970-429-1831 or [liz.oconnell@cityofaspen.com](mailto:liz.oconnell@cityofaspen.com)
